REVIEWS

The first book in 'The Mysterious World of Cosentino' series is very promising. James Hart's illustrations do a marvellous job at bringing Cos's friends (who consist of an anthropomorphic padlock, among others!) to life, and kids will love reading about Cos' amazing magic tricks and the secrets behind them. Plus, at the end, Cos teaches you how to do one of the tricks in the book, making it a perfect book for budding magicians and beginner readers aged seven and older.
